

# Let **AST** Bring you the **Sterile World!**

## OUR SERVICES

### Ethylene Oxide (EO) Sterilization

We developed Boaz EtO Reclamation, providing a zero gas emission sterilization solution with 99% recycling efficiency. Our technology leads to a remarkable 99.96% reduction in emissions, mitigating cancer risks from prolonged EO exposure. Already Patented in USA, Taiwan, Israel ,Vietnam and China

### Laboratory Service

All FED-STD 209E Class 100 compliance tests are performed in a constantly clean and controlled area. We bring together experienced scientists from different fields, including microbiology, chemistry, and biochemistry, as well as regulatory affairs personnel.

### Routine Sterilization Service

Conditioning, sterilization, and aeration procedures are done within the sterilizer. We provide the most advanced contract EO sterilization service to the medical device, cosmetics, pharmacosmetics, and pharmaceutical industries.

### Validation Service

Validation support from product review through cycle development, the validation protocol, test-piece selection, cycle running, and reporting. Our validation reports are key to helping many of our clients enter the US, European, Japanese, and Chinese markets.

**Global Excellence in Certification:**  
**FDA, ISO, GMP, ISO9001, ISO13485**  
**Compliant.**

*We are here to help our clients' products reach the market as soon as possible, and increase the sterilization quality of the medical device in order to meet international standards. We therefore use the most advanced sterilization technology in preparing our clients' products for the international market.*
